Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 1-7, 9 and 17-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Knowles et al. (US 6,182,897) in view of Boris et al. (EP 0801355).

Regarding claims 1-7, 9 and 17-23, Knowles discloses the limitations of the claimed invention in Fig. 1-8, column 4, lines 36-50; column 5, lines 5-35; column 6, lines 21-37, design a custom-configured laser scanning system based on customer parameter but Knowles does not specifically disclose a custom design injection molding or any other machines.

However, Boris discloses a system that can design a custom filter or any other machines (the machine can be injection molding machine) based on customer requirements (see Abstract).

It would have been obvious to a person of ordinary skill in the art at the time of invention was made to modify the teachings of Knowles with the teachings of Boris in order to meet different customer need.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
